How to Make Your Own Exploration Kit

Choose a container that is large enough to hold all of your exploration materials and is easy for you to carry.

**Exploration Materials:**
A *sketchbook* and *pencils* to make observational drawings while exploring.

A *notebook* to write down important information about your explorations.

*Brushes* of different sizes to reveal and clean delicate discoveries.

*Tape* of different widths and colors for many different exploration projects.
**Small tongs** to collect tiny specimens during your explorations.

A **magnifying glass** for closer observation of specimens discovered.

A **tape measure** to measure all sorts of discoveries.

An **observation container** to observe and study living creatures.

A **sorting tray** to sort and categorize interesting discoveries.

A **collection box** to save any interesting discoveries.
